

Telefónica IoT as a Service (IoTaaS)

IoT is the next industrial revolution. Are you ready to be part of it?

Telefónica SMART IoT

Re-inventing the smart experience beyond IoT connectivity at all levels

 <p>End-to-end Application Simplifies integration amongst different cloud platforms and apps</p>	 <p>Security Includes security functionalities to enhance control over devices</p>	 <p>Analytics Offers specific dashboards and additional reporting functionalities</p>
 <p>Managed Connectivity Provides a wide set of connectivity management functionalities including inventory, real time expenses controls, alarms, automatic business rules, reporting...</p>		
 <p>Devices Allows remote management of devices through the device management functionality</p>		
 <p>Network Technologies Integrates not only the typical network technologies such as 2G, 3G, 4G LTE, but also the new ones, such as LTE-M, NB, IoT, and Sigfox</p>		

Explore the opportunities of an IoT world with Telefónica SMART IoT

IOT Experience
Our customers and industry analysts recognize our capabilities

Global Product
Our IoT product is capable of serving business needs worldwide

Flexible & Scalable
Different service models fully adapted to customer needs

Reliable & Secure
High availability and QoS

Innovation
Our robust roadmap ensures customer growth needs are met

Go to Market
Easy to deploy. No integration needed

Time to Market
Just 2 months. Don't miss any IoT business opportunity

One-Stop Shop
From Managed Connectivity to IoT Vertical Solutions

Do you have any questions? We can guide you to get connected.
