

# International Voice Services

## Carrying your voice to everyone

As one of the world's leading operators, we are well placed to help you maximize the opportunities that International Voice can deliver.

Our powerful international network offers over 300 direct access routes, to more than 1,200 international voice destinations, and handles more than 24 billion international voice minutes every year.

We are the #1 fixed and mobile operator in Latin America, a market leader across Europe, and one of the top ten carriers worldwide. This means we can offer you outstanding service, expertise, reach, reliability, flexibility, speed and quality standards for termination services across our networks and the rest of the world.

## Key Benefits

- > The **best and guaranteed quality** for routing and termination services for international voice traffic at competitive prices.
- > **Global reach** with the strongest presence in Latin America and Europe (Spain, UK and Germany).
- > **Wholesale Quality and Premium Quality** with pre-paid and post-paid solutions.
- > **Personal service** through a dedicated account manager.
- > **Daily traffic monitoring and Antifraud Services (Tuku Web).**
- > **Continuous innovation and development** of our services to meet the latest market demands.
- > **Guaranteed quality across all service features**, underpinned by our Full-IP network.

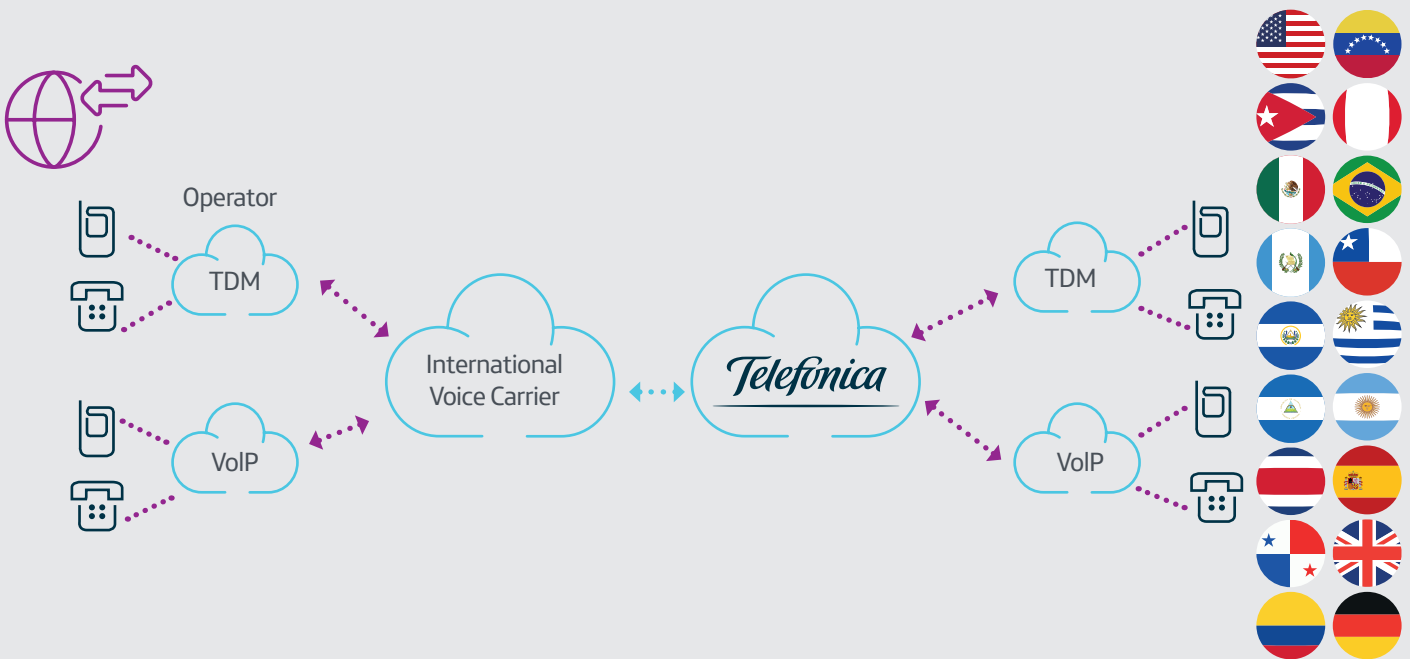

# Service Features

- > Network extension without the need for advanced planning or CAPEX investment.
- > Two service options available:
  - **Wholesale Quality** - competitive prices with international quality standards.
  - **Premium Quality IPX** - the best quality while assuring redundancy routes, CLI transparency and CLI identification.
- > Pre and Post-payment solutions.
- > SBCs incorporating security features to **protect** against **massive attacks**.
- > **Antifraud Services** and reporting.
- > **Global** footprint.
- > The broadest **interconnection flexibility**, based on our strong infrastructure and **Full-IP network**: Internet, VPN, IPX with SIP and SIP-I / T signalling protocols.
- > Supports G.711, G.729, G.722, G.722.2 and more.

## > Typical Applications

### Case 1: Termination OBs (Telefónica Group's Carrier)

### Case 2: Hubbing
